

FML-320 Model

Roll to Roll Label Automatic Thermal Film Laminator

Introduction:

FML -320 label automatic roll to roll thermal laminating machine is fit for laminating adhesive label material. It mainly consists of unwinding system, laminating system, rewinding system. Heating roller heated by hot oil circulation system to ensure the accuracy of the cylinder temperature. Unwinding installed with web guide system, compact structure, high degree of automation, humanized operation, it is an excellent choice for large and medium-sized label converter. It can decrease the cost of traditional film laminating.

Main Technical Parameter:

Model	FML -320
Max. Paper Width	320mm
Unwinding Diameter	600mm
Rewinding Diameter	600mm
Laminating Temperature	0-120°C
Max. Speed	60m/min
Power	5.5kw
Dimension(L*W*H)	1700*900*1350m
